

# MSP 232

## Quick Start

- Mic to line level pre-amp
- Variable impedance
- Extend microphone compatibility & device support
- Dual USB power outputs
- Convenient DC power thru

# PRODUCT INTRODUCTION

The MSP 232 is a converter of microphone to line level pre-amp. It is developed based on mini's requirement for the microphones without power supply. It is also developed with function of noise reduction.

The development of MSP 232 is composed of two parts, one is for microphone to linear audio, the other is for DC power, which is divided into 12V and USB 5V, and USB 5V power supply supports most intelligent devices in the market.

## MSP 232 System Connection

RGBlink offers solutions to demanding technical problem. Any application questions, or required further information, please contact with our customer Support Engineers.

4	12V/1A Power jack
5/6	USB Power Supply

# USE YOUR PRODUCT

## Connection

### Power:

Connect MSP 232 input power jack with 12V/1.5A adapter, and connect MSP 232 output power jack and mini/mini+ or other devices supported 12V/1.5A with 6CM power switch cable. As shown in the figure below:

Two USB power output: 5V/1A (per port), 5V/500mA (MAX). It can supply power to phone, fill light or other devices supported 5V/500mA. As shown in the figure below:

## Audio:

Connect MSP 232 audio input jack and microphone without power supply with 3.5mm audio cable, and also connect audio output jack and mini or other devices with audio cable. As shown in the figure below:
