mini suite case

This Dedicated Portable Case made of high-strength PP material is equipped with one 13.3-inch IPSdisplay, one switcher and one LED control card. Integrated audio and video switching, PTZ cameracontrol, multi-view monitoring, recording, LED management in one case, this portable and shock - resistant carry case is perfect for all sites, from music festival to lawn wedding, sports competition and other outdoor activities.
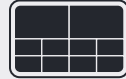

| Portable and compact | Highly integrated | Cost-effective |
| Out of the box | Hydraulic rod bracket | Built-in monitor |

Push flow

You can directly push streams through the network port RTMP(S) without a laptop, and support up to 2 platforms to push streams at the same time. With RGBlink's self-developed TAO cloud, 32 third-party platforms around the world can push streams at the same time, explaining the powerful integration function.

Live broadcast

Whether it is mx or edge, it can be connected to a variety of external devices, such as cameras, notebooks and rich audio sources. It is rich and flexible. It can be easily completed for live demonstrations and streaming, realizing the advantages of multi-function all-in-one machines, and live broadcasting is more professional!

Control

The integration includes the canvas in the picture, the pivot map, the reduction and cropping parameters, the signal source selection, the preset camera position of the PTZ camera, etc., Without the need for an additional control panel, 4 cameras can be controlled at the same time in this machine, and the camera can be adjusted, scaled, and the viewing angle can be controlled at any angle through the standard VISCA protocol, and the camera position can be changed at will.

Pre-supervision

The director station has an integrated LCD display, and the air box has a built-in 13.3-inch IPS highlight monitoring screen, allowing you to monitor each scene screen and all audio and video input signal sources in real time.

Switch effects

It has 17 kinds of switching effects to transition and switch between live video programs and presets.Call the saved preset view and the scaled video layer to get the professional look of the prepared broadcast or presentation.

Subito™

LED display Control system

Built-in LED sending card for air box
Realize the function of convenient carrying and
immediate connection to control the LED display.

High strength
PP engineering plastic material

High-strength safety protection suitcase, shockproof,
compression-resistant and durable
Easy to carry, you can broadcast wherever you want

Inside the carrying case
13.3 inch widescreen display

Integrated 13.3-inch 350 nits HD ISP screen,
Integrated design of screen console, can be used out of the box

Comes in the box
Active cooling fan

Integrate the fan in the box to improve the internal utilization rate
Long-lasting release of machine high performance

Waterproof and dustproof、
Anti-kick

The interface is equipped with a dust-proof plug
to achieve all-round protection，
It is effectively waterproof and dustproof and
prevents accidental kicks.

Air box
Integrated design

The front of the air box integrates an audio interface
and USB-B (LED control port)，
Bring intuitive and convenient operation experience

USB-C
Multi-function application interface

Can be customized to achieve live broadcast recording,
media video material,
Multimedia applications such as omnidirectional microphone
audio and video capture

Carry it with you without burden

The compact design ensures ultimate portability and durability
No matter where you go, mobile live streaming is at your fingertips
