

Video {processing} for any scale

Quick Start

- 4 HDMI inputs, 1 HDMI output
- 6 images multi-view, switch between preview and program
- 2.1 inch TFT full color screen
- Support MIC and LINE audio input, multi-channel mix audio
- Image scaling & cropping
- Support PIP,PBP
- Support T-Bar switch
- LOGO overlay
- Support PC and APP control
- Optimized heat dissipation performance
- Integrated design, compact and portable

Product Introduction

Introducing new mini.

With all the features of the preceding model including the unique built in LCD preview display, the mini streaming switcher features four HDMI high-definition inputs, a configurable HDMI output and USB3.0 streaming output to connect with virtually any laptop or streaming platform.

PIP picture in picture receives a boost in this new release, with dual fully scalable video windows in any position possible.

Make use of audio from multiple sources with mix including Line and TRRS connectors as well as supporting headphone/mic combinations.

mini is powered via standard USB-C port for even greater compatibility and mobile live flexibility.

With industry leading hardware performance and reliability, along with superior heat management and dissipation, mini is the must have mini streaming switcher.

mini is light and robust at only 480gm thanks to an all new impact resistant, precision pressure cast ABS housing.

2.Rotate and push 「Y」 knob to select YES or NO

Info

Push MENU and rotate and push 「Y」 knob to enter the ninth menu item<INFO>

INFO shows Device SN,IP address,MAC address,MAC address,MCU version,Video version.

S Button

When you want to personalize your live show, you can use the mini's 14 built-in switching effects and control the timing of the switch via T-BAR.

Push S button to enter transition effect menu<MIX> and the LED indicator beside  will light up;

Push S button **twice** to enter mode switch menu<MODE> and the LED indicator beside  will light up;

Push S button **three times** to enter menu<PIP> and the LED indicator beside  will light up;

Push S button **four times** to preview four inputs;

Each time the menu is opened, the corresponding indicator light will be on, and then rotate the PUSH knob ("Y") to select and confirm.

MIX

Press "S" button to enter transition effect menu<MIX>, there are 14 kinds of effects

To change the switching effect, proceed as follows.

1. Press the "S" button to stay in the effects screen.
2. turn the 「Y」 knob to select the effect

In actual use, the hard cut is only available in **Quick Cut** mode, if you use T-Bar mode, it will automatically change to FADE.

MODE

Push S button **twice** to enter <MODE> menu, and rotate 「Y」 knob to select **FAST** or **T-BAR**

After selecting Quick Cut, you need to select the switching time: from **0.5s to 5.0s**.

The steps are as follows.

1. Press the "S" button until you enter the mode interface.
2. Press the 「Y」 knob and wait for the option to turn yellow.
3. Turn the 「Y」 knob to change the parameters.
4. Press the 「Y」 knob to confirm.

In **T-Bar** mode, you can directly control the progress of the T-Bar manually and customize the switching.

PIP

Push S button three times to enter <PIP> menu and select PIP mode(9 PIP modes)

The steps are as follows:

- 1.Push "S" button, enter PIP setting page.
- 2.Rotate 「Y」 button to select layout you want and confirm by Pressing.
- 3.Select the signal you want for background. (When the letter is A, it means background signal)
- 4.Press 「X」 button to select signal for PIP layer. (The A will change to B)
- 5.Finally, push the T-Bar and the content you've set will be taken to PGM. (T-bar has to be totally left or right side to make sure the content has been taken.)

How to Enter PIP Menu Quickly

"S" button has memory function. When the TFT screen returns to preview mode, press S button to directly enter PIP menu if you use it last time. If you want to enter other menus, continue to press the "S" button.

Switch Source

When you access the four source buttons, the lights on the source buttons will appear in four states:

green constant: the signal is recognized, no action is being taken;

green flashing: the currently selected, signal is being edited;

red constant: the signal is currently on the main output;

unlit: the source is not accessed or the resolution of the accessed source is not supported by the mini

In FAST + TIME Mode:

Press a source button (1, 2, 3, or 4) that is green.

Selected source will be switched to the output with the set fade TIME and using the MIX transition selected, with the pressed source button becoming red.

In T-BAR Mode:

Press a green button to set the source as the PVW, the source button will blink green.

Slide the T-BAR to switch/mix from the current PGM source to the PVW source. Any MIX transition effect will be applied as the T-BAR is moved. Once the T-BAR has been **fully** transitioned, the indicator lights on sources buttons that are PGM and PVW will be swapped.

1. Press a source button (1, 2, 3, or 4) that is green.

2. Slide T-Bar from left end to right end or reversely.

Note: Source selection is **locked** when T-BAR is **in transition** (not entirely docked at a left or right position)

XPOSE mini Operation

Install dedicated software named XPOSE to control mini or mini+.

Right click the setup exe file .

Choose Run as administrator to open the exe and install the software.

After software is installed, click the icon

XPOSE and login the software.

Click Search to search mini device.

After searching, all available mini devices in the sub-net can be found, up to 128 devices can found if there are.

Select the desired device by SN and IP and enter the management interface. The software interface is a simulation of operation panel on real mini device.

For example, clicking Button M  can open up menu as on the device. If it is the first time for you to use mini, we suggest you watch our User Guide video.

Click the drop down arrow and click to play the user guide video.

If you have use XPOSE mini before,then you can directly click and check sub menu.

Following sections are dedicated to the additional features of XPOSE mini.

Live Streaming

Device Capture: choose RGBlink USB3.0 Capture

H.265: When it is ON, users can watch 4 inputs streaming back on XPOSE software.

Import the related OBS application if users need to do live streaming, click Relate to confirm.

OBS: slide ON to start streaming.

Note: H.265 and OBS cannot work at the same time. User choose either H.265 or OBS, not both.

Test Pattern

To facilitate troubleshooting, XPOSE mini provides a test signal output, which can be used to troubleshoot the USB or HDMI output interface when there is no output signal from USB or HDMI.

1. Select the USB/HDMI interface to be tested.
2. Select the mode of the test signal
3. Adjust color

Password Protection

In order to solve the problem of control conflicts caused by different devices controlling the same mini in the same LAN, XPOSE mini provides a password protection function, as an administrator, you can set a password for the device controlling XPOSE mini, and when you control the interface again, you need to enter the password to control it.

Note: If you have forgotten your password, please restore the factory settings on the mini.

T-Bar Calibration

If the T-Bar is not in the correct position, no other operation is possible. T-Bar correction is available in XPOSE mini.

The steps are as follow:

1. Turn on the T-Bar Calibration switch.
2. Push the T-Bar to the **far right** on the mini.
3. Turn on the "On" switch
4. Push the T-Bar to the **far left** on the mini.
5. Turn on the "On" switch

YouTube Streaming

1. Create a video or post.

2. Then click “Go live”.

3. Enter Live streaming interface. And then create a title.

4. Click “More option”.

5. Set video and audio as USB 3.0 Video/Audio device.

6. After finished all setting, click “NEXT”.
