Use Your Product

Signal Switch

1. Gently touch **【HDMI 1】** in the bottom menu bar.
2. Select the signal you want to choose/switch.

1. Source Status: --No Source; --Ready; --Selected.
2. Only by switching to the UVC signal can the control be achieved. Grey status of UVC signal indicates unavailable status.

Streaming

Following steps take YouTube stream as example:

1. Make sure TAO 1pro connect to the network.

2. Open YouTube Studio on your computer, select **【Go Live】** -- **【Stream】**, Copy Stream URL and Stream Key.

3. Create a new TXT file first, and paste the Streaming URL and Stream Key (the format must be : `rtmp://YOUR STREAM URL/YOUR STREAM KEY`), and save the TXT file to USB as `rtmp.ini`. (Newline is required to add multiple streaming addresses) and connect the USB disk to TAO 1pro's RECORD USB port.

4. Click [Stream Output] icon to enter the following interface.

5. Click [Confirm] to enter the [Stream Output Config] interface.

6. Click [ON AIR] to stream (support up to 4 live streaming platforms at the same time).

Source Status: --Available but Failed in Streaming; --Streaming.

Player

1. Insert a USB flash drive into the USB 2.0 port and then play the video in the USB.
2. Press the icon to enter the [Player] interface and select the video you want to play.

Note: If there is no USB flash drive inserted, the icon displays gray status.

NDI Decoder

1. Set the IP address (same as the network of camera), subnet mask and gateway in [Network Settings] of [Scroll Area].
2. Press the icon to turn on the switch to start NDI decoding function.

NDI Encoder

Press the NDI decoding icon to enter the interface to set relative parameters.

Recorder

1. Plug USB hard drive to TAO 1pro USB 2.0 port.
2. Click record icon to start recording.

Note: If there is no USB flash drive inserted, the recording icon displays gray status.

Settings

Click [Setting] in Scroll Area to enter following interface to set Input Settings, Network, Bluetooth, UVC Control, Fan Control, Stream Output, NDI Decoder, NDI Encoder, Display and About.

Input Settings: Input Signal, Input Format, Audio Sampling Rate, Signal Name, Brightness, Contrast, Saturation, Hue and Sharpness.

Network: Set IP Address, Netmask and Gateway.

Bluetooth: ON/OFF. Turn ON Bluetooth and choose the device to be connected to achieve control of PTZ camera.

UVC Control: Adjust parameters of PTZ cameras connected to TAO 1pro.

Fan Control: Set fan speed and fan mode.

Stream Output: Set display mode, resolution, frame rate, bitrate.

NDI Decoder/Encoder: Same settings as previous parts shown.

Display: Set the brightness of the output, HDMI output resolution and display rotation.

About: Include device info, language setting, update setting and factory reset.

Brightness/RGB Waveform/Vector/Histogram

Click Brightness/RGB Waveform/Vector/Histogram to select position and transparency.

Audio Meter

Click Audio Meter to adjust settings of input and output audio.

Viewfinder

Click [Viewfinder] to select frame size(16:9 or 4:3). Users can cut out the screen outside the frame based on the actual size.
