

D4

Quick Start

- Internal YUV4:4:4 processing
- 12 Bit processing
- HDMI 2.0 compatible
- HDCP 2.X compliance
- DisplayPort 1.2 Compatible
- HDR Compatible
- 12G/6G/3G/HD/SD SDI input compatible
- 4K@60 outputs including HDMI 2.0, DisplayPort 1.2
- EDID management
- Up to 8K2K output splicing
- Independent PST,multiple pictures seamless switching
- Multiple operation mode
- Support for flip image
- Support multiple cascade control

Product Introduction

With standard any in and any out, D4 is so much more than 4K scale.

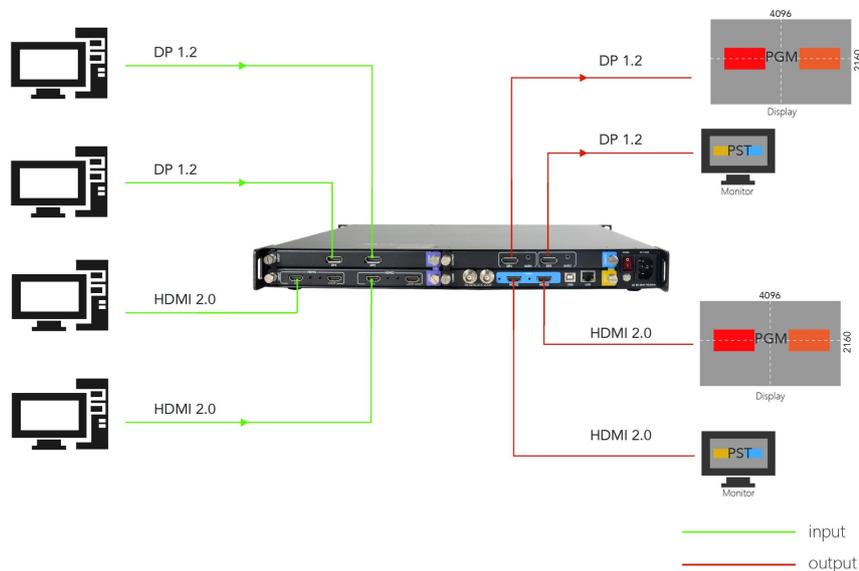

With multiple output modes, D4 is a very flexible solution across a range of applications whether for scaling, presentation switching, 4K distribution or broadcast.

Truly an All-In-One solution, D4 accept a wide range of input signals in a huge array of formats. Inputs can be converted, scaled, transcoded to standard to HDMI 2.0 outputs or output to optional ports including DP1.2, 12G/6G/3G/HD/SD SDI, Fiber port and HDBaseT.

With a built-in dual channel 4k scaler, D4 provides 12bit interface connection, with EDID management, HDCP2.X compliant and YUV4:4:4 10 bit color reproduce. Based on the flexible modular structure, D4 can be expanded to more connection or any connection in need, but not features only as a standard unit, besides its embedded and de-embedded audio processing capacity.

System Connection Diagram

This is the typical diagram for switcher and presentation application with multiple 4K/2K connection.

D4 System Connection Diagram

Packing Configuration

**AC Power
Cord**

**HDMI
Cable*2**

USB Cable

USB Disk

**Anti-Static
Bag**

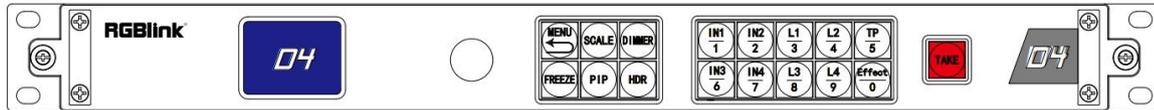

Note:

AC Power Cable supplied as standard according to destination market.

Upgrade tool package and user manual are stored in the USB disk, please keep it.

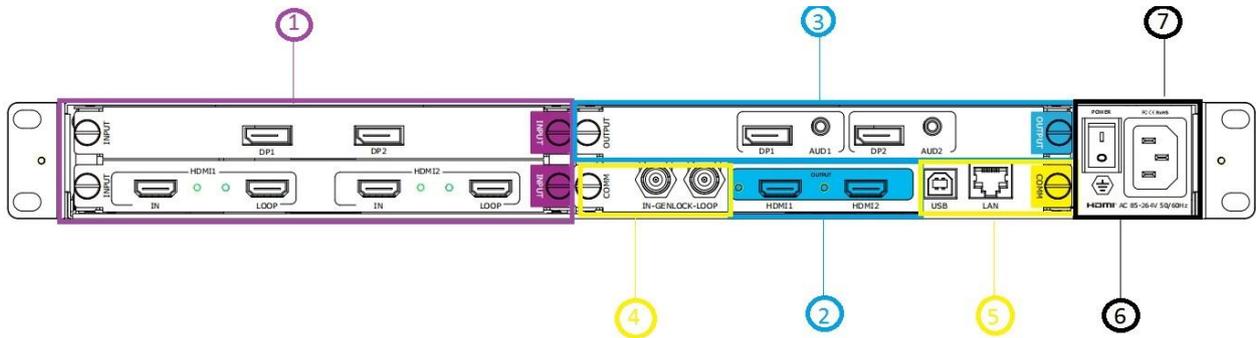

Hardware Orientation

Front Panel

Button Instruction			
	Number button 0~9, use for scale, crop, zoom and custom setting		Input signal source button
	Show operation menu items		Test pattern button
	Layer selection button		Short cut button to open Effect menu
	Confirm and adjust OLED menu		Scale button
	Menu and back button		Dimmer button
	Picture in Picture Button		Freeze Current Image
	High Dynamic Rang Image button		Switch from preset to program with transition effect

Rear Panel

Chassis Module Structure			
1	2 input module slots, support DP1.2,12G SDI HDMI 2.0 and 3G SDI Input Module (The bottom slot support HDR)	4	Genlock In/Loop
2	2 standard HDMI output (HDR Supported)	5	Communication connectors including:1 LAN port, and 1 USB-B
3	1 output module slot, support 4K HDMI,DP 12G SDI and 3G SDI output modules	6	Power switch
		7	Power socket

Use Your Product

Output Setting

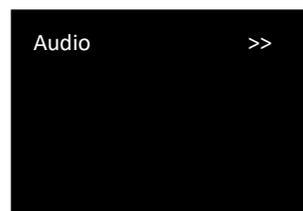

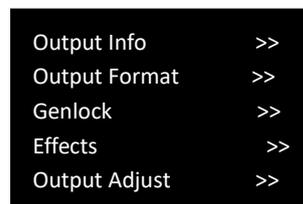

D4 system is default in English, after Initializing, the device will enter the main interface.

Press MENU button and enter the the menu item. Rotate the knob and select Output

In Output sub-menu, there are items as follows:

1. **Output Info:** output resolution,signal type, greyscale,color space etc

```
No HDR Support
-----
Output 2:      HDMI2.0
3840x2160@50
HDMI Mode      HDMI
```

```
Bits           8Bits>>
Color Space     YUV
No HDR
-----
Output 3:      DP 1.2
```

```
3840x2160@50   I
Bits           8Bits>>
Color Space     YUV
```

2. **Output Format:** users can rotate the knob to choose desired output resolution from 60 types of normal resolutions up to 4096x2160@60

```
Output Format
3840x2160@50
```

3. Custom Format

In the first page of MENU items, there is **Customize Format** available.

```
Input          >>
Output         >>
>Customize Format >>
View          >>
Transition     >>
```

Users can custom output resolution by input numbers on the front panel.

```
Customize Format:
>3840x2160@24
```

Turn the knob to resolution line and press the knob ">" (arrow) change to "*" (star) put in the numbers for width value, then press the knob to confirm the number.

Put in the numbers for height and frame rate in the same way. For example setting resolution 2560x1152@60, here are the steps:

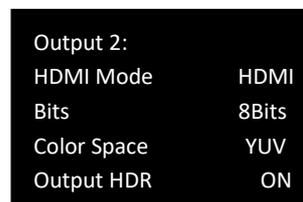

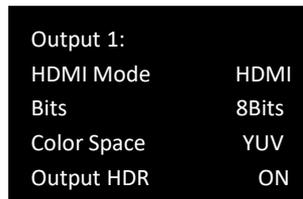

Note: The number buttons turning green indicate that users can use button to key in numbers.

4. **Genlock:** users can turn on or off Genlock and set Genlock Format.

Users can turn the knob to choose Genlock Y or Frame lock and choose Genlock Resolutions.

5. **Output Adjust:** users can turn on HDR adjust here.

Note: HDR require input source device and processing device and display device, all need to support HDR otherwise the HDR adjust cannot work.

Here is contrast example of before and after HDR adjust

Before HDR ON

After HDR ON

6. **Effects:** users can set output image effects here. To open up Effect menu, just press Effect button on the front panel.

Layer	N/A
Brightness	>>
Contrast	>>
Chroma	>>
Black&White	OFF

Layer: to choose Layer A or Layer B as the main picture for PIP and to swap layer.

Brightness: ranging from -1024 to 1024, users can not only adjust the overall brightness but also the brightness of R,G,B, each ranging from -1024 to 1024

>Brightness	1024
Brightness R	1024
Brightness G	1024
Brightness B	1024

Contrast:range from 0-399

Chroma:range from 0-399

Black&White: On/Off

Hue	180
Color Temp	6500K
Gamma	Gamma 1.0
H Sharpness	0
V Sharpness	0

Hue: rang from -180 to 180

Color Temp:rang from 6500K to 9300K

Gamma: select from Gama 1.0, Gamma 1.8, Gamma 2.2, Gamma 2.6

H Sharpness: adjust horizontal sharpness, rang from -10 to 10

V Sharpness:adjust vertical sharpness, rang from -10 to 10

Noise Reduction	>>
Flip V	OFF
Flip H	OFF
Reset	OFF

Noise Reduction: 6 noise reduction made available.Each rang from 0 to 3.

Horizontal NR	0
Vertical NR	0
Temporal	0
Block NR	0
Mosquito NR	0

Combing NR	0
------------	---

Flip V: vertical flip On or Off

Flip H: horizontal flip, on or Off

Reset:On or Off, select on to reset all above parameter.

7. Audio: select the output port for audio, users can choose Auto or output from Port 1 to Port 4.

*Audio	Port 2
--------	--------

Input Setting

1. **Input Info:** shows the input info of each input port as input resolution, Color Space(RGB/YUV) and HDR.

```
Input 1:  
No Input  
No HDR  
RGB
```

2.Sizing Adjust:

1)adjust input size and position.

```
H Size      1408  
V Size      832  
H Pos       0  
V Pos       0  
Reset Size  OFF
```

2)Crop input source.

```
MASK TOP      >>  
MASK BOTTOM    >>  
MASK LEFT     >>  
MASK RIGHT    >>  
RESET MASK
```

3.**EDID Management:** Select EDID destination port and source. Custom EDID is available.

```
Destination    Port 1  
>Source:      RGB4K
```

Destination Port: select from 1 to 4

Source:RGB4K,FOLLOW,CUSTOM,RESET

Choose CUSTOM to Customize Format for input.

```
Customize Format:  
*3840x2160@60
```

Transition Setting

1. **Mode:** to select the transition mode for for switching. Cut or Fade available.
2. **Duration:** the duration time of transition. If under Fade Mode, duration time range from 0.0-2.0s

Mode	Cut
Duration	Invalid

Test Pattern

1. **Type:** Users can choose OFF to disable test Pattern, or choose Pure Color or Color Bar as test pattern
2. **Red,Green,Blue:**RGB value for test pattern, each one range from 0 to 255

*Type	Color Bar
Red	255
Green	255
Blue	255

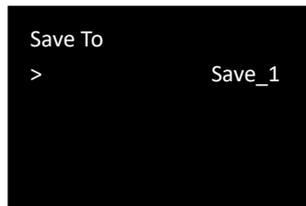

TP button on the front panel is the short cut button to open Test Pattern menu.

View (Save&Load)

Save To	>>
Load From	>>

1. **Save To:** save settings made above to Save_1,2,3...16, use knob to choose SAVE 1,2,3...16

2. **Load From:**load saved settings from Save_1,2,3...16, use knob to choose Load 1,2,3...16

System

1. **System Info:** show MCU version,Serial Number, and IP address of the device.

2. **System Mode:** PIP, Switch, Standard, Presentation,

3. Language 语言: To select English or Chinese .To quick switch language between Chinese and English, long

pressing **MENU+SCALE**   buttons for 3S.

Scale Button

Press Scale Button on the front panel to enter scale setting menu as follows:

Channel	CH.1
H Size	3840
V Size	2160
Ratio	3840
H Pos	0

V POS	0
Reset	OFF

1. **Channel:** choose from CH.1/CH.2/CH.3/CH.4
2. **H SIZE:** set the horizontal pixels of output image
3. **V SIZE:** set the vertical pixels of output image
4. **Ratio:** Set the scale ratio by putting in the horizontal width, the vertical height will be auto adjusted according to the ratio of new width/old width.e.g. Set ratio as 1920 and the first width is 3840, the height will be automatically adjusted to 1080.
5. **H POS:** set the horizontal position of image
6. **V POS:** set the vertical position of image
7. **RESET:** If operation is not proper, turn knob to <RESET> and start over.

PIP Button

Press PIP Button on the front panel to picture in picture setting menu as follows:

>PIP	ON
Layer	Layer B

1. **PIP:** select On or Off
2. **Layer:** select layer A or B as main picture.

DIMMER Button

Press Dimmer Button  on the front panel to set Dimmer value or long pressing Dimmer button the value can immediately skip from 0 to 128.

```
>Dimmer      128
```

Dimmer range:0-128

HDR Button

Press HDR button  on the front panel to activate HDR feature:

```
>Input Port      Port2  
In HDR Support   ON  
Output Port      Ch.1  
Out HDR Support  ON
```

Input Port:select from Port1 , Port 2, Port 3, Port 4

In (input) HDR Support On or Off

Output Port:select from Ch.1 or Ch.2

Out(input) HDR Support On or Off
