Live interaction

......

TAO APP is a live broadcast software independently developed by RGBlink. It has a series of functions such as live broadcast and interaction, list, community, flexible payment, membership system, and offline translation supporting multiple languages and dialects around the world. It helps content creators to live with cost-effective accounts. In addition, you can push live streaming through the TAO platform itself, push 30+domestic and overseas live platforms, gain more public domain traffic, easily realize your live demand, and use the TAO APP to achieve more functions.

More than a mobile phone │ Tablet live stream

·Support TAO live broadcast
·Support third-party live streaming
·Support OTG live streaming: empowering your smart devices

Support 30+ platforms streaming at the same time

Not only can TAO stream on itself, but also stream to up to 30+ other platforms simultaneously, covering most of the live broadcast platforms, gaining more public domain traffic.
